

EXPONENT GAME

YOU WILL NEED:

- 2 Players
- 2 dice
- Paper and pencil
- Calculator

Directions:

- 1) **Player 1 begins by rolling 2 dice. The first die rolled is the base number. The second is the exponent number. (Ex: a 2 followed by a 3 would be 2^3)**
- 2) **Evaluate the expression and write it down in your chart. (Ex: $2^3 = 8$)**
- 3) **Player 2 does the same as Player 1 did.**
- 4) **Total points as you go along.**
- 5) **When the time is up, the player with the most points wins.**
