

NAME _____

DATE _____

PERIOD _____

In pairs, solve the following equations. After solving them, arrange the answers in order from least to greatest. Write the variables used in the equations below the answers. It should spell out the answer to this riddle:

Why didn't the skeleton cross the road?

1. $-3.421 - (-15.13) = O$
2. $53.2 + 8.14 - 15.261 = T$
3. $-24.56 + (-5.07) = H$
4. $-17.3 - 26.85 = I$
5. $-18.94 + 42.31 = G$
6. $73.42 - 18.6 + (-4.382) = S$
7. $13.7 - 22.06 - 4.36 = A$
8. $14 - 9.67 + 3.2 = N$
9. $-51.6 + 4.31 + 6.93 = T$
10. $82.73 - 39.97 = U$
11. $61.08 - 93.75 + 32.67 = D$

Arrangement of answers from least to greatest:
