

Name _____

Period _____

Practice with transversals.

- 1) Name four line segments. _____
- 2) Name three rays. _____
- 3) How many planes are there in a rectangular prism? _____
- 4) Name two vertices. _____
- 5) Name two lines. _____
- 6) List two right angles. _____

- 7) Name one obtuse angle. _____
- 8) Name one acute angle. _____
- 9) Measure one of the angles with a protractor. _____ Then, name the angle. _____
- 10) Name a pair of vertical angles. _____
- 11) Name a pair of corresponding angles. _____
- 12) Name a pair of alternating interior angles. _____
- 13) Name a pair of alternating exterior angles. _____
- 14) Draw a pair of supplementary angles that are adjacent.

- 15) Draw perpendicular lines.

- 16) Draw parallel lines.

- 17) Draw a transversal where the lines it intersects are not parallel.

- 18) What is meant by a constant rate of change on a graph? Explain
